PROFILE

I have the desire and determination to be the best of who I am.

I am a 3rd-year IT student honing my skills as a software developer and looking forward to being part of your great company. I am looking for a place to enhance myself and a work placement as well. If given the opportunity for a permanent spot then I would be willing to work and be of value to the company. I would be very pleased to be trained and learn as I see myself diving into an adventure.

Aside from my 8-year involvement in putting smiles on people's lives, I seek to leverage my experience in this new life journey I am taking and am hopeful to be of contribution to your great company.
